

Gene essentiality confusion matrix

iYali21 | PO1f / SD-Leu | KO/WT < 15%

Consensus essential list only | All 1,058 model genes

Recall 19.06% | Precision 68.54% | Accuracy 72.87%

*Negative class = model genes absent from the consensus essential list (1,058 - 320 = 738).
This is a list-membership definition; it does not establish experimentally verified nonessentiality.
